

IEC 60870-5-101 - Linux Target Platform – Software Development Kit (SDK)

IEC101-SDK-LINUX Read Me Notes:

Welcome to the IEC 60870-5-101 - Linux Target Platform - Software Development Kit (SDK).

IEC 60870-5-101 demo library, we used the compiler - gcc

gcc (Ubuntu/Linaro 4.6.3-1ubuntu5) 4.6.3 - i686.

We used the code blocks IDE to build the test projects.

This evaluation package allows you to:

- Read the product manual
- Browse the IEC 60870-5-101 library API documentation
- Study the source code of the IEC 60870-5-101 examples provided
- Modify and compile the IEC 60870-5-101 examples
- Create your own IEC 60870-5-101 programs and test them using the library

Limitations and Restrictions

In addition it does not contain any redistributable components. You must not redistribute any Source, object or library files.

Files part of the package

Folders & description:

LinuxSDK

- **header** - IEC101 Protocol Standard header files and Target platform header files
- **intermediate** - Compiled intermediate files generated by code blocks IDE
- **library** – pre Compiled Static library (libiec101.a) generated by code blocks IDE
- **output** – Compiled output files generated by code blocks IDE
- **project** – Code Block Project files, server & client test
- **source** – IEC 60870-5-101 Sample server & client test c Program

Please find the documentation files at the following location

FS-IEC101-V21.04.001\Documentation

Both Simulators & SDK work as Demo for up to 100 signals/points.

You can use the source code of the application examples and modify them according to your needs.

If you need any technical support, please contact us, (<mailto:support@freyscada.com>)

We are also providing teamviewer support (for testing with ASE Test tool, tmw Test harness, winpp).
